

Compassvale Secondary School and Changkat Changi Secondary School

August , October 2020

Singapore

Students from Compassvale Secondary School and Changkat Changi Secondary School took part in the new programme format for The International SeaKeepers Society, Asia Educational Outreach Programme.

Created on a “plug and play” concept , combining an available documentary video followed by a quiz game , a lesson plan has been developed for easy application by the school’s teachers whilst still focusing on marine science and conservation to raise awareness about global ocean issues.

Illustrating the flexibility of its application, 48 students of Compassvale Secondary School experienced the lesson as part of a self-learning online activity for the school’s Environment Club , whilst 20 students from Changkat Changi Secondary School took part in a classroom session which was delivered by the teacher in charge .

The video “Islands of Singapore: The rich marine life of Pulau Jong”, is part of a CNA documentary series featuring the various islands that make up Singapore and its marine biodiversity. The video also gives an insight into the work of the marine scientist and volunteer community which takes place on the islands. The quiz game focuses on the marine biodiversity of Singapore with some interesting facts about Singapore built in.
