SeaKeepers 20th Anniversary Celebration

SeaKeepers hosts its 20th Anniversary Celebration at the annual Founders dinner on November 1st, in Fort Lauderdale during the Fort Lauderdale International Boat Show. We will be honoring our 2018 SeaKeeper Award Recipient, Michael Saylor, and recognizing 20th Anniversary Honorary Guest, The REV Ocean Project, founded by Kjell Inge Roekke. Additionally SeaKeepers will be presenting the Nextgen SK Award for young professional leadership in the area of marine conservation and/or the yachting industry. Learn more and RSVP to the event [here](#).

Citizen Science

On August 7th, 2018, SeaKeepers participated in the Biscayne Bay Water Watch, providing data concerning water temperature, pH, salinity, and dissolved oxygen. [Learn More](#)

In The Loop

The International SeaKeepers Society Recognized!

SeaKeepers has volunteered to support citizen science efforts for the past three years helping with the Biscayne Bay Water Watch Initiative, monitoring and analyzing data concerning water quality in our coastal waterways. SeaKeepers has recently been recognized as the organization that has collected the most samples. [Learn more about SeaKeepers work with the Biscayne Water Watch Initiative](#)

Through The Porthole

Vampire Squid (*Vampyroteuthis infernalis*)

The vampire squid is a small cephalopod found throughout temperate and tropical oceans in extreme deep sea conditions. It is able to live and breathe normally in the minimum zone at oxygen saturation as low as 3%. Of all deep-sea cephalopods, their mass-specific metabolic rate is the lowest. If disturbed, it will curl its arms up outwards and wrap them around its body, turning itself inside-out in a way, exposing

spiny projections. It may eject a sticky cloud of bioluminescent mucus containing innumerable orbs of blue light from the arm tips, presumably to daze would-be predators.

In Memoriam

Richard DeVos (1926-2018)

Our deepest appreciation and gratitude to Richard DeVos for his support to the International SeaKeepers Society. His generosity as an Admiral Club member helped to establish the International SeaKeepers Society.
