News from our Neighbours and Partners Around the Globe

The International SeaKeepers Society based in Miami, Florida with a chapter in Singapore, established the Carbon Impact Program (CIP), which was launched to the public in Asia in November 2021. The CIP is a hub of resources that include a carbon footprint calculator, blogs that cover topics on eco-conscious living, a recognition page that spotlights vessels implementing sustainable practices, and [A Green Guide to Boating](#), a manual that highlights tips and resources for recreational boating.

“Do not leave shore without a copy of ‘A Green Guide to Boating,’ a wonderfully rich source of wit and wisdom about how to explore and enjoy the ocean with a light touch, and of inspired ways to safeguard ‘what’s under the boat’ – Earth’s living blue heart.” - Foreword by Dr. Sylvia A. Earle, Marine Biologist, Oceanographer, Explorer, Author, Lecturer & National GeoExplorer in Residence.
