

M/Y PLANET NINE TENDERS

The ultimate expression of yachting capability, PLANET NINE, designed by industry titan Tim Heywood, is recognized as one of the world's most exciting explorer yachts.

Delivered in 2018 by Admiral, outwardly PLANET NINE is a fortress of a yacht, iceclassed, with excellent seakeeping, speed and range.

PLANET NINE's capability is legendary. Her commercially rated helipad, refueling system and hangar built for an Agusta Grand A109 or similar helicopter provide a further dimension to her outstanding performance and capability. When the on-board helicopter is garaged, she can be used for additional "touch and go" flights. Her "all-weather fleet" of toys and tenders includes two 10m custom-built Rupert RIBs, ideal for scouting, comfortable and safe for guests. All Rupert tenders powered by Volvo stern drives (35–40 knots)
